**Assessment/Comment:**

In the available sample residues of the analysed pesticides below the maximum residue limits for other herbal infusions were detected. In this regard the sample is in accordance with Regulation (EC) No. 396/2005 on maximum residue levels of pesticides in its current version.

Taking into consideration the processing factor (F=4) the sample meets the standard prescribed by organic associations of max. 0.010 mg/kg concerning pesticides. Assuming the provisions of Regulation (EC) No. 834/2007 on organic production are met, then labeling the sample at hand as "organic/bio" is justified.

Maximum residue level (MRL) according to European Regulation (EC) No. 396/2005, EU-RHG-Ausnahmereverordnung, Rückstands-Höchstmengenverordnung - RHmV (German Maximum Residue Levels Ordinance), in the current versions. A = General maximum residue limit; H = Maximum Residue Level acc. to RHmV; N = Reevaluation; K = Correction; AE = Amendment; List of pesticide-active agents can be sent on request.

The laboratory sites of the SGS group Germany according to the abbreviations mentioned above are listed at <http://www.institut-fresenius.de/filestore/89/laborstandortkuerzelsgs2.pdf>.
